Vendor Alert VA 2013-03

As a reminder, all California software abstracting vendors must receive CCR Vendor Approval prior to releasing 2013 software version to registrars in California.

We are currently waiting for an updated NAACCR edit Metafile (version 13A) and will proceed with abstracting software vendor approvals once that is received. The CCR anticipates accepting cases diagnosed 2013 in NAACCR version 13 on June 3, 2013.
