Vendor Alert VA 2014-006

Expanded Testing Window for Vendor Development test files

The CCR has extended the testing window for the purpose of testing Vendor files of all record types specified in Volume II appendices A, B, C, and D, to the date of 03.17.2014.

Submitting files are optional, but mutually beneficial to both the CCR and Vendors if errors are discovered on either end of this process - a process which is essentially a trial-run of the Vendor Approval process that the CCR is ready for on 03.31.2014.

To submit Vendor Development test files, please email them to cremen@ccr.ca.gov as password-protected zip-files (if the information is of actual patient data and not made up). Normally, the password is emailed in a separate email, though you may also call (916)731-2552 if you wish to share it in a separate manner, entirely.

For those Vendors that wish to submit files that have first been run through the CCR's BETA metafile for the 2014 Data Changes, this file is released. The final metafile is scheduled for publication on 03.31.2014.
