Vendor Alert VA 2014-007

2013 Software Vendor Approval

ERS version 10.8 is approved to abstract and transmit cases diagnosed January 1, 2013 and forward OR any cases abstracted after the installation of this software.

Some confusion arose as ERS 10.7 had already been approved, when ERS released their 10.8 version, and this notification is meant to clear up any questions about the software being approved by the CCR.

The software is not approved for cases diagnosed in 2014. We're making a point of saying that since it is very close to the time of year when such approvals are done - the CCR starts the 2014 vendor approval process on 03.31.2014.
